

OctoPerf receives the French Tech grant from BPI

Aix en Provence, France, the 15th of February 2017, OctoPerf, performance testing software vendor, is proud to announce it has been awarded the French Tech grant.

This state subsidy is granted by the French Bank for Innovation (known as BPI) and is dedicated to young innovative companies with a large growth potential. It aims to help them mature and develop their project.

It is another key step to allow OctoPerf to move faster and support our growth. Innovation is key in the performance testing industry and this will allow us to make OctoPerf even easier to use and more efficient in any given situation.

Several major functionalities are being developed and will be released on the first semester. We will keep innovating in 2017, as we did in 2016.

We would like to thank BPI for this decision which confirms our innovative strategy and we will keep you posted soon about new innovations.

About OctoPerf

OctoPerf is a French performance testing software vendor that democratizes performance testing. OctoPerf has developed a SaaS solution that supports cloud & on premises testing with a very short learning curve. OctoPerf is based on JMeter, the famous open-source solution. JMeter is made easy by OctoPerf thanks to a very intuitive user interface allowing users to perform a complete testing campaign from script creation to results analysis in a web browser.

About BPI

Bpifrance finances businesses from the seed phase to transfer to stock exchange listing, through loans, guarantees and equity. Bpifrance accompanies firms developing export activities, in partnership with Business France and Coface, and provides support to their innovation projects. Bpifrance offers businesses the benefit of a powerful contact, on hand and able to respond efficiently. Bpifrance, whose two equal shareholders are the French State and the Deposits and Consignment Fund (Caisse des Dépôts), acts in support of public policy established by the State and the Regions.
