

Neueda, a new OctoPerf certified service partner

Aix en Provence, France, 13rd June 2016: OctoPerf, the performance testing software editor is proud to announce that Neueda, an IT consultancy, training and software development company based in Belfast has received OctoPerf certification.

The OctoPerf certification qualifies Neueda to offer reliable performance testing consultancy services based on Octoperf to any company or person requiring it.

It also gives Neueda the possibility to organise OctoPerf training to customers based on a methodological approach allowing users to quickly learn how to master OctoPerf.

The OctoPerf team is delighted to count a new and valuable partner able to deliver a highly qualified & local service in UK & Ireland with the expectation to extend this footprint. It is the company's desire to cover the global market with very dynamic & reliable partners able to provide a close and methodological collaboration with customers.

About OctoPerf

OctoPerf is a French performance testing software editor. OctoPerf has developed a SaaS solution that supports cloud & on premises testing with a very short learning curve. OctoPerf software is based on JMeter, the famous open-source solution. JMeter is made easy by OctoPerf thanks to a very intuitive user interface allowing users to entirely perform a complete testing campaign from script creation to results analysis in a web browser.
