

An OctoPerf certified partner in Netherlands & Belgium

Aix en Provence, France, 22nd June 2016: OctoPerf, the performance testing software editor is proud to announce that Polteq, an independent provider of software testing services, has obtained the OctoPerf certification for training.

The OctoPerf certification for training qualifies Polteq to offer training based on Octoperf software to any company or person requiring it.

It makes Polteq a trusted OctoPerf partner in Europe and more specifically in Netherlands and Belgium. It will ensure to Belgium and Dutch users a local training on Octoperf performance testing application on demand.

OctoPerf team is delighted to count a new valuable partner able to deliver a highly qualified & local service. It is the company's desire to cover the market with very dynamic & reliable partners able to provide a close and methodological accompanying.

OctoPerf is user friendly, easy to understand and allows testers, even beginners to master OctoPerf and performance testing within only few hours of training. An opportunity for any company driven by the idea to efficiently set-up performance testing with a cost reasonable investment.

About OctoPerf

OctoPerf is a French performance testing software Editor. OctoPerf has developed a SaaS solution allowing to make cloud & on premises testing with a very short learning curve. OctoPerf software is based on Jmeter, the famous open-source solution. Jmeter is made easy by OctoPerf thanks to a very intuitive user interface allowing user to entirely run a load testing campaign from the script creation to the result analyze in a web browser.
